

TREATMENT PLAN & COST ESTIMATE

22/01/2025

Patient's Name:	ASHIDA ABASS NYASU
Doctor:	Dr Jatin Kothari – <i>Director Nephrology & Chief Consultant Renal Transplant Medicine.</i>
Dr Jatin Kothari's Treatment Plan:	"Thank You for sharing the reports of patient Ashida Abass Nyasu a 29-year-old Female. As per the shared reports patient will require clinical physical evaluations along with Dialysis, blood investigations followed by SOS Kidney Transplant. We need to Clinically/Physically evaluate the patient with blood investigations, evaluation of bladder with VCUG X-ray, Cystoscopy & Urodynamic study along with routine evaluations and then can determine suitability for Renal replacement therapy (Kidney Transplant) with Compatible family donor only after complete evaluations. So if he comes for evaluation it will be better so we can take best decisions for his like. • Ignition of renal replacement therapy. • Renal biopsy. • All work up to find out reversibility of disease or its irreversible and permanent damage. • Depending on all, if disease not reversible and renal biopsy feasible then we can discuss renal transplant option with him also depending on the primary work and availability of live related donor in his family. Donor must be a related to the patient. Patient will require few investigations like CKD 5, ESRD, HTN, DM etc. Kidney Transplant is the best form of renal replacement therapy. Hospital Transplant coordinator will always help patient and relatives in completing transplant related legal formalities. Kidney Transplant can be done subject to permission from the authorized committee. Advice: Patient needs to visit Nanavati Max Super Specialty Hospital, Mumbai for evaluation and further treatment. Feel free to contact us for any further assistance. Warm Regards, Dr Jatin Kothari. Note: The treatment plan may change after complete evaluation of the patient. Any change of treatment plan will be in the best interest of the patient keeping specific findings in mind.
Doctor's profile:	https://www.nanavatimaxhospital.org/doctor/jatin-kothari
